## CAREER OBJECTIVE

---

Experienced Front-End Web Developer with over 1.5+ years of hands-on experience in HTML, CSS, JavaScript, and responsive design. Proficient in frameworks like Angular, Bootstrap, jQuery, and kendoUI to develop visually appealing and user-friendly web applications. Skilled in Agile methodologies, project management with Jira, and collaborating within cross-functional teams. Eager to apply expertise in delivering innovative web solutions.

## PROJECTS

---

### Qunductor

- Contributed to the development of Qunductor, a platform designed for streamlined Eligibility Verification processes.
- Utilized Angular for frontend development, enabling patient information import, project creation, and task assignment for RCM employees.
- Orchestrated verification of patient eligibility criteria in alignment with insurance parameters.
- Implemented functionalities such as document uploading, Excel export, and version updates from Angular 9 to 13, enhancing platform efficiency.

### Giveth - Meal Donation

- Developed an Angular-based web application for a meal donation project targeting underprivileged children.
- Implemented user registration, secure authentication, and payment processing functionalities.
- Designed a system for generating and managing unique GCC codes for donations.
- Created a mobile app for shopkeepers to scan GCC codes and ensure meal distribution.
- Implemented tracking, reporting, and analytics features for transparency and impact assessment.
- Successfully deployed the project and managed documentation.

### Policy Server

- Contributed to the design and implementation of a policy server product focusing on email restrictions and rules.
- Worked on Customer Admin, Super admin, and policy rules creation.
- Integrated APIs, ensured responsive design, and implemented 14 policies for rule creation.

## LANGUAGES

---

- English
- Hindi
- Marathi
